Training Sites

Truman Medical Centers

Recently named the #5 Top Academic center in the nation by UHC Criteria, **TMC-Lakewood** is a community hospital and Family Medicine is the only residency at this location, which provides residents extraordinary training and experience in all aspects of primary care.

TMC was once again named a Top 100 Most Wired hospital in the nation

Children's Mercy Hospital

After more than 100 years of caring for children, CMH continues to provide the highest level of pediatric services to all children. Technology, equipment and facilities all tailored to meet the intricate needs of our 'pint-sized' patients.

Family Medicine Residency

'One of the most comprehensive programs in the country'

A Great Place to Live & Learn!

TMC Lakewood is located in a country setting outside an eastern suburb of Kansas City - Lee's Summit, Missouri. This community hospital and long-term care facility provides a full range of diagnostic, therapeutic and rehabilitative services. Lee's Summit is a family friendly city which boasts an excellent school system, R-7 school district was ranked No. 7 nationwide in *Money* magazine's annual issue focusing on 'America's Best Places to Live' (small city listing). **Lee's Summit** scored highest in **education** and second highest in **jobs/economy**.

TMC Lakewood and Lee's Summit, MO form the perfect union. TMC-L offers the perfect venue for training primary care physicians by family medicine faculty and Lee's Summit provides the perfect location to raise and educate a family.

RURAL TRAINING

The UMKC Family Medicine Residency Program is one of the top four largest in the country with 14 residents per class.

These two rural positions provide a bridge

*Todd Shaffer, MD, MBA
Program Director*

of academic training into rural communities. Flexible times of the medical training will be an apprenticeship model integrating residents into the rural community.

Fellowships

Geriatric Medicine

Fellows have a sincere desire to provide care to the frail and elderly. Receive training in patient care, consultation, teaching and research. Fellows are taught and supervised by faculty with experience in Geriatric Psychiatry, Family Medicine, Internal Medicine, Rehabilitation, Hospice and Palliative Care.

Sports Medicine

Receive training and experience to become confident and competent in the management of athletic health concerns. The curriculum provides a solid foundation, with unparalleled preparation for a primary care Sports Medicine career.

Surgical OB

Women's Health is a vital component of Family Medicine and a strong emphasis of our residency program. We do not compete with OB residents for patients. Annually our Family Medicine physicians deliver about 1200 babies and perform over 95% of the c-sections.
